Projects

Customer Relationship Management (CRM) System — Mini Project	Jan 2026
---	----------

- Designed and implemented a CRM workflow to manage customer leads, contacts, and opportunity stages.
- Structured sales pipeline movement and mapped lead progression across defined lifecycle stages.
- Generated dashboards to monitor pipeline visibility and interaction history.
- Identified process gaps and simulated structured follow-up mechanisms for improved tracking.

ImagiGen — Text-to-Image Generation Web Application (SaaS Application)	Nov 2025 – Dec 2025
---	---------------------

- Built a full-stack web application integrating AI-based APIs for text-to-image generation.
- Defined feature requirements and mapped user input workflows to backend processing logic.
- Implemented secure authentication and structured access control for system reliability.
- Integrated REST APIs to ensure seamless frontend-backend communication.

Leadership & Practical Experience

Founder — Online Solution Tours & Travels	Kolkata 2019–2021
--	---------------------

- Gathered customer requirements and translated them into structured service offerings.
- Managed end-to-end process flow including inquiry handling, solution customization, and follow-ups.
- Coordinated between clients and vendors to ensure execution aligned with user expectations.
- Developed practical understanding of user pain points and solution-driven thinking.

Computer Science Instructor — UrbanPro	Jun 2023 – Present
---	--------------------

- Broke down complex technical concepts into structured, user-friendly explanations.
- Identified learning gaps and adapted delivery methods based on user feedback.
- Strengthened analytical thinking and stakeholder communication skills.

Certifications

Data Analytics with Python — CampusX (2025)
Full-Stack Web Development — Apna College (2025)
